Project Portfolio: github.com/byvictorrr

Education

California Polytechnic State University, San Luis Obispo — Fall 2020
Bachelor of Science in **Computer Engineering** — Overall GPA: 3.89
Canada College – Redwood city — June 2018
Certificates in **Engineering and Computer Science**

Skills

Programming Languages: C, C++, Python, Java, Shell, Verilog/System Verilog, Assembly, SQLite, mySQL
Hardware Testing Devices: Function Generator, Digital and Analog Multimeters, Oscilloscope, DC Power Supply
Technologies: Arduino, Raspberrypi, AWS, UNIX, FPGA
Applications: Eclipse,Vim, Sed, Xilinx, Microsoft Word/Excel/PowerPoint

Professional Experience

Machine Learning Lead Intern (25 hours per week) — June 2018 – September 2018
ICE Lab (CSUSF) – San Francisco, CA

- Assisted in developing an android application for a Neural Machine Interface (NMI)
- Set up an AWS server to get a working mySQL base in order to store users data

<u>Technical Projects – Cal Poly:/Independent:</u>

Autonomous Solar Tracker (SolarRat)

- Sweeps through 12 positions via servo motor and records a pair data: intensity of light and position
- Uses an arduino and a RAT MCU (see below)
- Written in RAT assembly language, the data is sorted based on intensity and is fed to the Arduino to turn the servo to that position

Autonomous Phone Projector (aProjector) - still in progress

- Projects a magnified phone image on the wall and autofocuses
- Used a basic physics equation - thin lens equation in the program
- Reads in from a distance sensor how far away it is from the wall and controls the motor

Assembler (Mips Assembler)

- Implemented an assembler in Java that transforms Neumonics into the mips machine code

Microcontroller (RAT MCU)

- Designed a fully functional computer that has around 40 instructions, in System Verilog
- Consists of basic modules: Program Rom, RAM, PC, SP, ALU, CU, ect.

Leadership and Work Experience

Science Technology Engineering Math Tutor (STEM) – Canada College
Tutor (10 to 15 hours per week) — December 2016 – June 2018

- Enhanced leadership, communication, and interpersonal skills through tutoring peers in computer programming, physics, and calculus

Secretary of the Computer Science Club – Cañada College

January 2016 – June 2016
