Project Portfolio: github.com/byvictorrr

Education

California Polytechnic State University, San Luis Obispo
Bachelor of Science in **Computer Engineering**, June 2020 Overall GPA: 3.89
Cañada College – Redwood city
Certificates in **Engineering and Computer Science**, June 2018

Skills

Programming Languages: C, C++, Python, Java, Javascript, Shell, Assembly,SQLite, mySQL, SysVerilog
Technologies: AWS, UNIX, Raspberrypi, Arduino, Function Generator, Digital, and Analog Multimeters
Applications: Vim, Intellij, Eclipse, Sed, Xilinx, Microsoft Word/Excel/PowerPoint

Computer Engineering Experience

Machine Learning Lead Intern (25 hours per week) June 2018 – Sept. 2018
ICE Lab(CSUSF) – San Francisco, CA

- Assisted in developing an android application, for a Neural Machine Interface (NMI)
- Set up an AWS server to get a working mySQL base in order to store users data

<u>Technical Projects – Cal Poly/Independent:</u>

Minimal UNIX Shell(mush - minimal shell)
– Implemented a shell in C with the features of bash: pipelining, directory changes and ect.

Virtual Wallet (MagWallet)
– Wrote an electronic wallet program in Java to store any credit cards/cal poly id's
– Used JBDC to create a connection to an AWS server, to save username and password for each wallet
– Additional option to upload a card to a device called MagSpoof

Assembler (MIPS Assembler)
– Designed an assembler in Java to transform MIPS assembly code to machine code

Autonomous Point to Point Backup (RPI Camera AWS backup)
– Wrote shell scripts for a Raspberry Pi (RPI) and an Amazon Web Server(AWS) to sync data
– Uses Cron and Rsync to achieve autonomous backups of data recorded on the RPI Camera

Word Counter (Frequency word – fw)
– A program co-created with a classmate returns a sorted list of the n most common words in a file or set of files, sorted by order of frequency.
– In the case of a frequency tie, words later in the alphabet take precedence over earlier words.

Leadership and Work Experience

Science Technology Engineering Math Tutor (STEM) – Cañada College
Tutor (10 to 15 hours per week) December 2016 – June 2018

- Enhanced leadership, communication, and interpersonal skills through tutoring peers in computer programming, physics, and calculus
- Helped students with Math before the school year started

Computer Science Club – Cañada College

- Held the secretary position
