Project Portfolio: github.com/byvictorrr

Education

California Polytechnic State University, San Luis Obispo
Bachelor of Science in **Computer Engineering**, June 2020 Overall GPA: 3.89
Canada College – Redwood city
Certificates in **Engineering and Computer Science**, June 2018
GPA: 3.94

Skills

Programming Languages: C, C++, Python, Java, Javascript, Shell, Verilog/System Verilog, Assembly,SQLite, mySQL
Hardware Testing Devices: Function Generator, Digital and Analog Multimeters, Oscilloscope, DC Power Supply, Op Amp Circuit Board
Technologies: Arduino, Raspberrypi, AWS, UNIX, FPGA
Applications: Eclipse,Vim, Sed, Xilinx, Microsoft Word/Excel/PowerPoint,

Computer Engineering Experience

Machine Learning Lead Intern (25 hours per week) June 2018 – Sept. 2018
ICE Lab – San Francisco, CA

- Assisted in developing an android application, for a Neural Machine Interface (NMI)
- Set up an AWS server to get a working mySQL base in order to store users data

<u>Technical Projects – Cal Poly:/Independent:</u>
Autonomous Solar Tracker (SolarRat)
– It sweeps through 12 position via servo motor and records a pair data: intensity of light, position
– Used an arduino and a RAT MCU(see below)
– Wrote the program in assembly language, the data is sorted based on intensity and is fed to the arduino to turn the servo to that position
Autonomous Phone Projector(aProjector)
– It projects a magnified phones image on the wall and autofocuses
– Used a basic physics equation - thin lens equation in the program
– The Arduino is fed the distance the projector is away from the wall and turns the motor the amount
Assembler (Mips Assembler)
– Designed an assembler in Java that transforms a large set of instructions into the mips machine code.
Microcontroller (RAT MCU)
– I designed a fully functional computer that has around 40 instructions, in System Verilog
– This computer consists of basic modules: Program Rom, RAM, PC, SP, ALU, CU, ect.

Leadership and Work Experience

Science Technology Engineering Math Tutor (STEM) – Canada College
Tutor (10 to 15 hours per week) December 2016 – June 2018

- Enhanced leadership, communication, and interpersonal skills through tutoring peers in computer programming, physics, and calculus

Computer Science Club – Canada College

- Held the secretary position
